

11:30

All members simultaneously join the virtual call

Everyone explains their contributions since meeting 3

All objectives complete

11:45

Discussion begins over next iteration and next updates

Other class's midterms and assessments will make it difficult to coordinate over the following week so the team decides to delegate 2 weeks worth of work in this meeting

Next step is decided: **Connect front-end to back-end and stopping the use of stub databases**

Reminders to have members only make changes in their respective branches and not push to main unless fully functional

12:00

Beginning steps and work is done while in call so members can cross reference within the team to understand lines that they did not contribute on themselves.

12:30

Meeting concluded
