9:30 Start of class

All members enter at or before 9:30

9:40
All members arrive and attendance is taken along with the weekly briefing for progress

9:45

Updates are the following:

Nathan and Elvis both tried to make front-end to back-end connections however were unsuccessful in their endeavours and had to terminate their branches once too far gone

Sean TJ and Tim had marginal success later on with a few API call errors due to miscommunications

9:50

Team determines that connection must be top priority for next week's presentations and that text correspondence should be of utmost importance.

Work is done for the remainder of the time

10:30 Meeting concluded lecture begins
